## EXPORTS OF U.S. SEEDS IN 1974/75 VALUED AT RECORD \$113 MILLION

The value of U.S. seed exports continued its upward climb in the year ending June 30, 1975, increasing 7 percent over the previous year's value, while the volume of exports declined for the second consecutive year. A decline in export of all forage seeds except bluegrass and bentgrass, plus the declines in export of sorghum seed and corn seed (excluding sweet corn), accounted for most of the total decline in export volume. These same seeds also showed declines in their export values, although these declines were less severe because prices per unit of sale for these and all major seeds and seed groups were higher than in the previous year. The increases ranged from a low of 9 percent for all forage seeds to a high of nearly 100 percent for pea seeds. The price increase for the seed industry as a whole was over 40 percent for the current year compared with the previous year.

During this reporting period, U.S. seeds were exported to more than 126 countries. Of these, the 10 most important ones, based on value in millions of dollars, were: Canada (\$22.1), Mexico (\$16.0), Japan (\$8.3), France (\$6.8), United Kingdom (\$6.6), Netherlands (\$5.6), Italy (\$5.4), West Germany (\$4.5), Brazil (\$2.9), and Argentina (\$2.8). These 10 countries accounted for nearly 80 percent of the volume, and almost 72 percent of the value of seed exports. The nine next most important markets on value basis were: Australia (\$2.5), Republic of South Africa (\$2.4), Spain (\$2.3), Venezuela (\$2.1), Chile (\$1.8), Sweden (\$1.6), Iran (\$1.4), Poland (\$1.3), and Denmark (\$1.2). The group of nine accounted for nearly 11 percent of the volume and 15 percent of the value of U.S. seed exports. Together, the top 19 markets accounted for over 90 percent of the volume and 86 percent of the value of U.S. seed exports.

Most of the countries in the top 19 imported a fairly broad variety of seeds from the United States. However, a few of them limited their purchases to a relatively few types of seeds. For example, nearly all of the seeds imported by Iran and Venezuela were vegetable seeds, while imports of alfalfa seeds dominated U.S. exports to Poland and Chile. Because of specialization in imports, the impor-

tance of these countries tends to change from year to year, depending on their current needs for these seeds.

Forage seeds continued to dominate U.S. seed exports again this year, accounting for nearly 40 percent of the total value of seeds exported. Nearly 60 percent of forage seed exports were accounted for by the various grasses, of which bluegrass (Kentucky and Merion) was the most important. Alfalfa seed (certified) was the single most important of all seeds exported. It had sales of nearly \$11.2 million, followed by peas, \$8.7 million; corn (excluding sweet corn), \$8.1 million; beans, \$7.8 million; grain sorghum and bluegrass (Kentucky and Merion), each with over \$6 million.

Value of vegetable seed exports increased more than \$11 million, or about 60 percent this year over the previous year, mainly because of a 50 percent increase in price per unit of sale. Mexico and Canada were the two most important markets, each taking over \$3.5 million worth. Japan was next, with \$2.2 million. Other countries with vegetable seed imports from the United States of \$1 million dollars or more included France (\$1.9), Netherlands (\$1.7), Italy (\$1.7), Brazil (\$1.2), Iran (\$1.1), and Argentina (\$1.0). These nine countries accounted for nearly 60 percent of total U.S. vegetable seed exports.

Value of pea and bean seed exports nearly doubled during this reporting period, even though volume remained practically unchanged. Most of the increase in pea seed exports went to the European Community, which nearly doubled the value of the previous year's purchases. Except for Denmark and Ireland, all EC member countries showed substantial gains in pea seed imports from the United States. Canada also nearly doubled its imports of pea seeds over those of the previous year, reaching nearly \$3 million. The more-than-\$4 million increase in exports of U.S. bean seed resulted from increased purchases by the United Kingdom, Canada, Australia, and the Republic of South Africa.

Flower seed exports continued to improve in quantity and value over the previous year's levels, but still accounted for less than 0.5 percent of volume and less than 3 percent of value of total U.S. seed exports.

Summary of U.S. Seed Exports by Type, Quantity, and Value, July to June, 1973/74 and 1974/75

Kind of seed	Quantity		Value		Unit price/pound			
	1973-74		1974-75		1974-75
